

**NORTHCREST SPECIALTY CARE STATEMENT  
JUNE 5, 2020**

UPDATE: NorthCrest Specialty Care has learned of two additional employees testing positive with Covid-19. This brings the total of staff members to three since our first notification dated May 26, 2020. As of this notice we have no residents testing positive for COVID-19. Due to privacy regulations, we aren't able to share more information about the employees. We continue to follow CDC and Iowa Department of Public Health infection control guidelines. The health and safety of our residents and our employees is our main priority.

We have notified our staff, residents and family members of this development to keep them informed. We have been and will continue to screen all staff at the beginning and end of their shift for signs and symptoms of COVID-19, and continue to monitor our residents' health and well-being. This involves screening our residents at least twice a day for symptoms including fever.
